

Your Home's Energy Use

A Publication Of The Missouri Public Service Commission

Did you know the typical U.S. family spends close to \$1,500 per year on their home's utility bills? Making your home more energy efficient will not only save you money, but can also improve the value of your home. Energy conservation helps reduce air pollution and conserves natural resources.

How We Use Energy

A Simple Home Energy Audit Could Save You Money

- ✓ Check for holes or cracks around walls, ceilings, windows, doors, light and plumbing fixtures. These openings can leak air in or out of your home.
- ✓ Check if your appliances and heating and cooling systems are properly maintained. Replace or clean filters as needed.
- ✓ Check the chimney. If you have a fireplace or wood stove, keep the flue damper closed when it is not in use.
- ✓ Check and clean warm-air registers and cold-air returns. Make sure they are not blocked by furniture, carpeting or drapes.
- ✓ For more tips, contact the Missouri Department of Natural Resources Energy Center at 1-800-361-4827

Created in 1913, the Missouri Public Service Commission (PSC) regulates investor-owned telecommunications, water and sewer, natural gas, electric and steam utilities. The PSC works to ensure that Missouri citizens receive safe, reliable and reasonably priced utility services. If you have an inquiry, billing question or service-related problem that your utility provider cannot answer, please call the PSC at 1-800-392-4211 or visit our website at www.psc.mo.gov
